PROFESSIONAL SUMMARY

Full-Stack Developer with experience developing and maintaining web applications using Next.js, React.js, TypeScript, Node.js, Express.js, NestJS, and PHP Laravel. Hands-on experience in frontend development, RESTful API integration, form validation, database operations, authentication, payment gateway integration, and real-time application features using Server-Sent Events (SSE). Currently contributing to production web applications, with a focus on frontend development, admin interfaces, reusable components, and API-driven workflows.

TECHNICAL SKILLS

Frontend: Next.js, React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, MUI, Redux

Backend: Node.js, Express.js, Fastify, NestJS, PHP, Laravel, RESTful APIs

Libraries & Databases: TanStack Query, React Hook Form, Yup, MongoDB, PostgreSQL, MySQL, Redis, Mongoose, Prisma ORM

APIs & Real-Time: JWT, OAuth 2.0, RBAC, Razorpay, Webhooks, SSE

Tools: Git, GitHub, Docker, Postman, VS Code, Vercel, Netlify, Render

PROFESSIONAL EXPERIENCE

Full-Stack Developer Jan 2026 – Present
JIIXEL ARC Pvt Ltd, Bangalore, Karnataka

- Develop and maintain web application features using Next.js, React.js, TypeScript, PHP, and Laravel across multiple projects.
- Develop frontend interfaces for the Okinawa Navi admin application using Next.js, TypeScript, React, and Material UI (MUI).
- Build reusable UI components, forms, data tables, and content management interfaces with form validation and API integration.
- Use TanStack Query, React Hook Form, and Yup to manage server data, handle form state, and implement client-side validation.
- Work with backend APIs and troubleshoot application issues to support feature delivery and maintenance.
- Collaborate with team members on requirements, implementation, debugging, and code changes using Git and GitHub.

Full-Stack Developer Aug 2024 – Dec 2025
Techfriar Technologies, Infopark, Kochi, Kerala

- Developed web application features using Next.js, React.js, TypeScript, Node.js, Express.js, and MongoDB.
- Designed and integrated RESTful APIs to connect frontend interfaces with backend services and database operations.
- Implemented JWT-based authentication, authorization, and role-based access control for application workflows.
- Integrated Razorpay payment workflows, including order creation, payment processing, and webhook handling.

- Contributed to the development of VoteFriar, a company project built with Next.js, TypeScript, Node.js, and Express.js.
- Implemented real-time application updates using Server-Sent Events (SSE) and contributed to frontend and backend feature development.
- Debugged application issues and supported feature development, database operations, and ongoing application maintenance.

PROJECTS

Okinawa Navi — Content Sharing Platform
Next.js, React.js, TypeScript, Material UI, TanStack Query, NestJS *Ongoing — Company Project*

- Develop frontend features for the admin application of a content-sharing platform using Next.js, React.js, TypeScript, and Material UI.
- Build and maintain admin interfaces for content management, including forms, data tables, media uploads, and content editing workflows.

VoteFriar — Real-Time Voting Platform
Next.js, TypeScript, Node.js, Express.js, BullMQ , Server-Sent Events (SSE) *Company Project – Techfriar Technologies*

- Contributed to the development of a real-time voting and polling platform with configurable workflows and administrator-facing result views.

Revalo — Vehicle Resale Value Estimator Live Demo
Next.js, TypeScript, Node.js, Fastify, MongoDB, Tailwind CSS *Ongoing Development*

- Independently developed and deployed a vehicle valuation platform that estimates resale values for cars, motorcycles, trucks, and commercial vehicles.
- Built a multi-step valuation workflow using vehicle specifications, mileage, condition, ownership, and location inputs.
- Developed frontend interfaces and backend services for valuation processing, API communication, and data handling.
- Deployed the application on a custom domain and continue to maintain and improve the platform.

CineMagic — Movie Ticket Booking Platform Live Demo
Next.js, Node.js, MongoDB, Razorpay, JWT, TanStack Query

- Developed a movie ticket booking application featuring movie listings, seat selection, booking management, user authentication, and payment processing.
- Integrated Razorpay for online payments and implemented role-based access control for application users.

EDUCATION

Diploma in Computer Engineering 2021 – 2024
I.P.T & G.P.T.C Shoranur, Kerala
CGPA: 7.8/10

CERTIFICATIONS

- MERN Stack Development – Wayone Technologies, 2024
- Cybersecurity Training – Commissioner Office, Kochi, 2023
